

Enclosures with Safety Interlock

>> [Hydra-Lift Drum Roller Video](#) <<

Enclosures with Safety Interlock Help You Comply with OSHA Requirements
([Hydra-Lift Drum Rollers](#) Sold Separately)

Enclosures for Morse Hydra-Lift Drum Rotators have a safety interlock to automatically shut off the drum roller when the gate is opened. Open the enclosure gate, secure your upright drum on the base plate, then close the gate to allow operation. An opening in the side of the enclosure provides access to the RAISE and ROTATE controls on the drum roller with the drum safely enclosed.

Outside post-to-post Dimensions:
L88" W40" H74" (224 x 102 x 188 cm)

Install all Morse Drum Rotators in accordance with OSHA requirements for enclosure and safety interlock, etc. Drum roller automatically turns off when enclosure door is opened.

For OSHA compliance, see OSHA subpart O.1910.212(a)(4) "Barrels, containers, and drums. Revolving drums, barrels, and containers shall be guarded by an enclosure which is interlocked with the drive mechanism, so that the barrel, drum, or container cannot revolve unless the guard enclosure is in place."

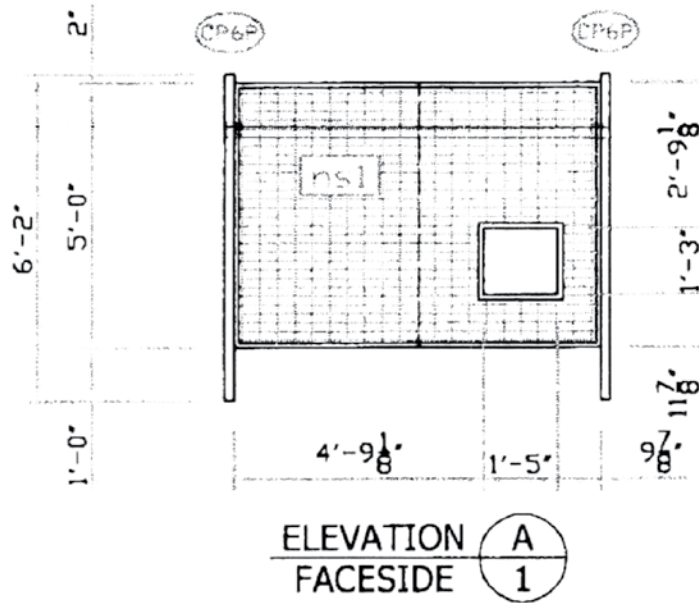

Power connections and motor controls must comply with applicable codes.
